

PREMATECNICA

Equipos e instalaciones para las industrias de proceso y energía

specific solutions for your plant of
BIOGAS

Design | Supply | Service

What does PREMATECNICA offer to you?

PREMATECNICA offers you the main equipment you need for your biogas plant: rotary and static equipment, specific instrumentation, gas detection, fire-fighting systems, control systems, etc. Our specialized technicians will help you to select the adequate equipment.

¡Our delivery program covers almost all your needs!

FLAME ARRESTERS - BREATHING AND EMERGENCY VENTS FOR THE DIGESTERS - LOBE BLOWERS - FLARES - PISTON COMPRESSORS - CONDENSATE TANKS - CHEMICAL DOSIFYING SYSTEMS - COMBUSTIBLE AND TOXIC GAS DETECTORS - FIRE-FIGHTING SYSTEMS - GAS FLOW MEASURING TURBINES - CATHODIC PROTECTION - PORTABLE AND FIXED CORROSION MEASURING SYSTEMS - ETC.

For more information please visit our web site:

After-Sales service

After helping you to choose the correct equipment and instrumentation and supplying it, our technical staff will install and start it up.

Our After-Sales Service gives you the warranty of original spare parts. And our maintenance staff will be at your service wherever your plant is located.

The advantage is clear:
One single Company who supplies, installs and
maintains your biogas equipment

Flares
Tailor-made, we use the best technology for our flares, including new generation flame arresters with temperature probe for higher safety. Our wide experience and prestige in the design and manufacturing of flares for the petrochemical sector is your best warranty

Flame arresters
State-of-the-art new generation flame arresters. With CE marking, manufactured according to the more strict European Standards 94/9/CE "Flame Arrester ATEX 100a" y EN12874 "Flame Arrester Standard". Our flame arresters can be supplied with temperature probe for better safety and process control

Condensates KO-drums
Our KO drums are adapted to you. Simple and tailor made: from the basic design you can choose the size, material and add all the instrumentation and purge system you according to your needs.

Gas-to-flare regulating systems
Please ask us about the different possible systems to regulate the flare-feeding gas.

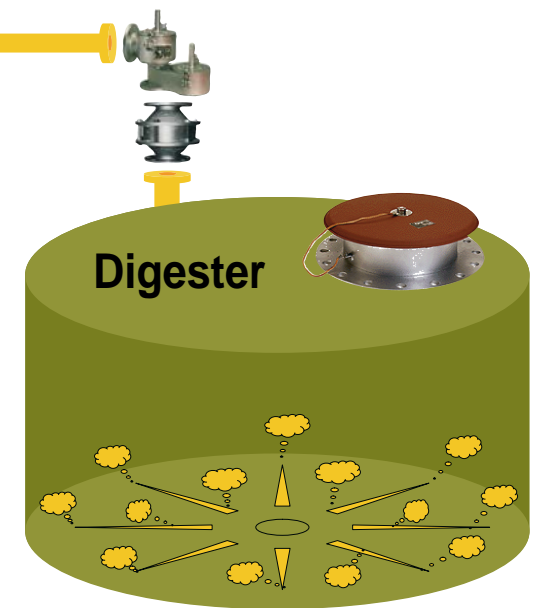

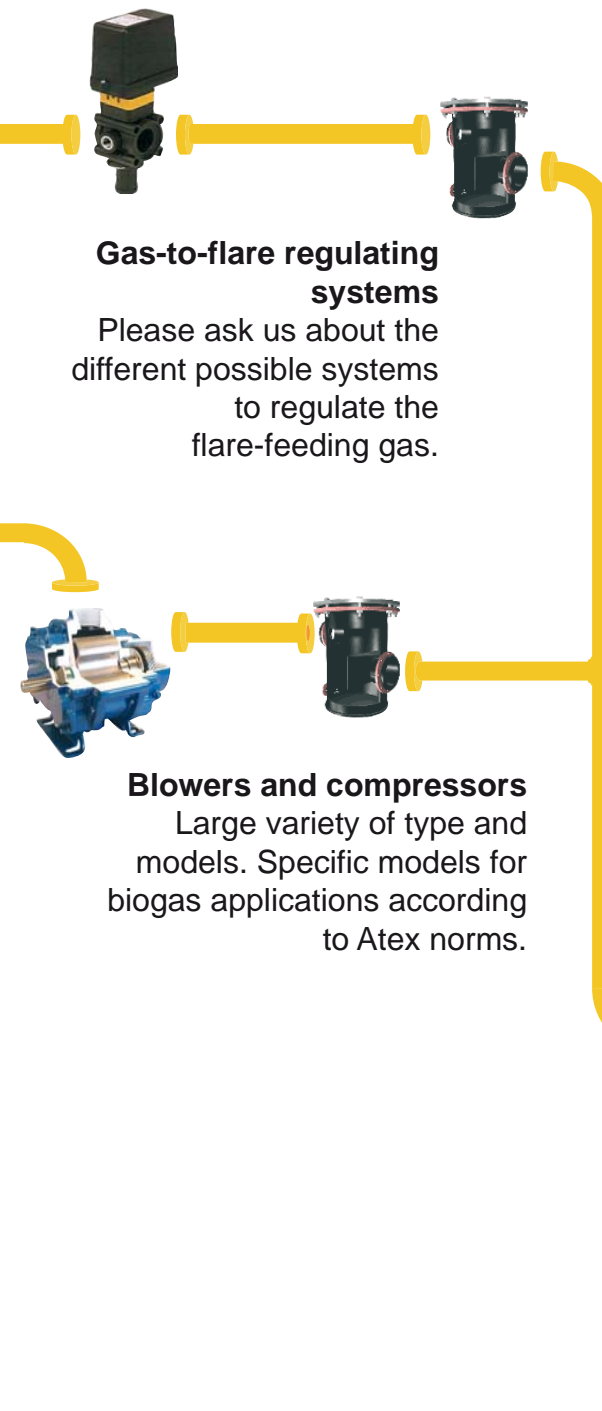

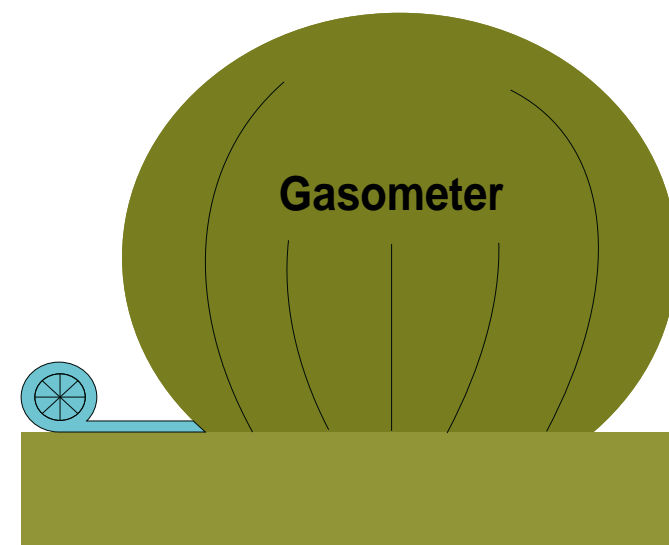

Conservation breather and emergency vents for the digester
Large variety of models and materials. You'll always find the right valve for your plant. Our valves are manufactured according to Atex Directive 94/9/EC.

Generation system

Flow-measuring turbines
Precise measuring and transmission of the gas flow.

Blowers and compressors
Large variety of type and models. Specific models for biogas applications according to Atex norms.

Control
Independent or integrated to your general system, PREMATECNICA designs and supplies the control system for the equipment we supply.

Because to its low production cost and its ecological character as its produced by the treatment of waste, **biogas** has become at internationally one of the most interesting power sources. Our traditional presence in the energetic market and the professionalism and experience of our staff makes of PREMATECNICA, S.A. one of the best positioned companies when advising, designing and supplying mechanical equipment and instrumentation in this emerging biogas market.

A signpost with a light green rectangular sign and a grey metal pole stands in a vibrant green field. The sign reads "KEEP THIS PLANET CLEAN" in green capital letters. The background is a bright blue sky filled with fluffy white clouds.

KEEP
THIS PLANET CLEAN

PREMATECNICA was founded in 1961 in Madrid (Spain). We started distributing, in the Spanish market, blue-chip equipment and instrumentation for the process and energy industries, starting our international expansion in 1980 with the incorporation of an associated Company in Mexico with national partners who have managed the operation of the same. This was the beginning of a new era for our Company. Today, fully engaged in a global business policy to provide effective responses to the demands of our clients, our team of experts develops a wide variety of equipment for the environment protection, energy efficiency and safety.

Since 1961...

...with all the energy
